Overview

The Ambarella H22S Sports and Drone Camera Processor is a system-on-chip that integrates an advanced image sensor pipeline (ISP), H.265 (HEVC) and H.264 (AVC) encoders, and a powerful Quad core ARM® Cortex™-A53 CPU for advanced analytics, computer vision, flight control, WiFi streaming, and other user applications.

Targeting the next generation of connected drones, sports, and 360° (VR) cameras, the H22S delivers up to 4K-video recording at 60fps or equivalent performance while streaming a second, live, mobile-resolution video over a WiFi network for preview or sharing.

Equipped with dedicated hardware, H22S can support 3D Electronic Image Stabilization (EIS) up to 4Kp30, and multi-exposure High Dynamic Range (HDR) capture up to 4Kp30.

A unique architecture and 14-nm process technology minimizes H22S power consumption while maximizing performance.
